

The High Desert Corridor Project

- A proposed new 8-lane, 63-mile freeway through a mostly undeveloped part of North LA County (Palmdale to Apple Valley)
- Would bring about more urban sprawl, dependence on cars, smog and greenhouse gas emissions
- A windfall to real estate developers. A burden to taxpayers – price tag unknown, but surely astronomical
- Neglecting our current crumbling infrastructure to build something new and shiny
- A bad idea. A bad use of public tax money.

Let Metro know what you think at: <http://theplan.metro.net/comments>

Produced by the Reduce Emissions TAC of the EnviroMetro coalition. To see the coalition's full platform, visit www.envirometro.org.
